## RESUME OBJECTIVE

DevOps Developer focused on **CI/CD**, specializing in optimizing, securing, and improving the performance of **APIs**, servers, and **AWS** environments. Proficient in **Python**, **JavaScript**, **SQL**, and advanced use of frameworks and SDKs like **FastAPI**, **Flask**, **SQLAlchemy**, among others. Skilled in integrating various APIs and **Auth** and **OAuth 2.0** authentication systems. Committed to creating systems and solving highly complex technical challenges.

## WORK EXPERIENCE

Apr 2023 - Dec 2023	<b>DevOps Developer</b> <i>Freelancer, Barcelona</i> <ul style="list-style-type: none"><li>I collaborated with a client in the design and development of custom APIs, as well as optimizing their ERPs.</li><li>I handled the management and automation of tasks in an AWS data center infrastructure.</li><li>I was responsible for security, including encryption, data integrity, and secure operations such as backups and migrations.</li><li>I integrated external APIs such as OpenAI, Meta, Google Cloud API, Twitter, and major OAuth 2.0 authentication systems, especially with Google.</li></ul>
Jan 2023 - May 2023	<b>Python Web Scraping</b> <i>Freelancer, Barcelona</i> <ul style="list-style-type: none"><li>I developed multiple web scraping scripts using libraries like BeautifulSoup, regular expressions, and a proxy (SDK).</li><li>I collaborated in data cleaning and restructuring, from handling datasets to analysis with linear regression and decision trees.</li><li>I corrected and optimized the code of various scripts.</li></ul>

## EDUCATION AND QUALIFICATIONS

Sep 2022 - Present	<b>Superior degree of Developerment of Multiplatform Applications</b> <i>Centro de estudios Politècnics, Barcelona</i>
Sep 2019 - May 2022	<b>Spanish Middle Grade SMIX</b> <i>Joan Pelegrí School, Barcelona</i> <ul style="list-style-type: none"><li>I collaborated with a client in the design and development of custom APIs, as well as optimizing their ERPs.</li><li>I handled the management and automation of tasks in an AWS data center infrastructure.</li><li>I was responsible for security, including encryption, data integrity, and secure operations such as backups and migrations.</li><li>I integrated external APIs such as OpenAI, Meta, Google Cloud API, Twitter, and major OAuth 2.0 authentication systems, especially with Google.</li></ul>
